Re: Conditioned License to Operate a Public Water System

Dear Mr. Cooke:

Attached is the 2011 license to operate a public water system for Munson Sunmart, Inc. In accordance with Ohio Revised Code (ORC) § 6109.21 and Ohio Administrative Code (OAC) Rule 3745-84-06, the Director of Ohio EPA has issued a license with conditions due to violations of the drinking water regulations at the public water system. The accompanying Findings and Orders describe the violations and the corrective actions needed to return to the public water system to compliance.

In accordance with OAC Rule 3745-84-04, the Director has issued a yellow conditioned license to operate a public water system. You are required to prominently display this yellow, conditioned license where it is clearly visible to the general public. If the requirements of this license are complied with, the public water system may be eligible for a green, unconditioned license for 2012.

Should Munson Sunmart, Inc. fail to comply with the conditions of this license, the Director may suspend or revoke the license to operate. Revocation of the license will prohibit the operation of the public water system. A public water system with a revoked license is prohibited from producing water for human consumption, which includes, but is not limited to, drinking, food preparation, dishwashing and hand washing.

In addition, owners or operators that fail to comply with Ohio's safe drinking water laws are subject to civil penalties of up to \$25,000.00 per day per violation under ORC § 6109.33. Operating with a suspended or revoked license may jeopardize other licenses you may hold, such as food service, liquor or campground operations.
