Monitoring Requirements

TOTAL MICROCYSTINS

1 Sample Set Required WEEKLY*

Total microcystins sample set refers to one raw source water sample at LT2001 and one finished water sample at EP001. A week is defined as Sunday through Saturday.

**Weekly sampling unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at <http://epa.ohio.gov/ddagw/HAB.aspx>. Reduced monitoring is contingent on a public water system continuing to experience NO raw or finished water total microcystins detections. Any total microcystins detections during routine (weekly) or reduced sampling will trigger additional sampling. Please refer to the website above for specifics on follow-up sampling requirements.*
