**** REMINDER: ** Consumer Confidence Report (CCR) is due July 1, 2021**

Chemicals

Monitoring Requirements

TOTAL MICROCYSTINS

1 Sample Set Required WEEKLY*

Total microcystins sample set refers to one raw source water sample at LT2002 and one finished water sample at EP002. A week is defined as Sunday through Saturday.

**Weekly sampling unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at <http://epa.ohio.gov/ddagw/HAB.aspx>. Reduced monitoring is contingent on a public water system continuing to experience NO raw or finished water total microcystins detections. Any total microcystins detections during routine (weekly) or reduced sampling will trigger additional sampling. Please refer to the website above for specifics on follow-up sampling requirements.*

1 Sample(s) Required between 11/28/2021 and 12/4/2021	
1 Sample(s) Required between 12/12/2021 and 12/18/2021	

Cyanobacteria screening sample is to be collected biweekly from raw source water at sample point LT2001 unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at <http://epa.ohio.gov/ddagw/HAB.aspx>. As of 12/31/17, all public water systems are responsible for contracting with a lab certified to perform cyanobacteria screening (qPCR). Please review the website for further information pertaining to follow-up sampling requirements for cyanobacteria screening gene detections, and certified labs that can perform analysis.

OH6300411 PAULDING VILLAGE

System Type: Community

Operating Period: 1/1 to 12/31

THIS SCHEDULE MAY NOT INCLUDE ALL MONITORING REQUIREMENTS FOR YOUR SYSTEM.

Contact your district office to review additional monitoring for operating parameters, and/or other monitoring requirements not included on this schedule.

Also, monitoring schedules may be revised during the year based on sampling results.

For water emergencies that occur after hours, please call 800-282-9378
