Emission test methods and reporting requirements.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (L) of rule 3745-73-01 of the Administrative Code titled "Reference to materials."]

(A) Compliance with any applicable emission limit for total reduced sulfur as specified in rule 3745-73-03 of the Administrative Code shall be determined according to one of the following:

(1) One of the reference methods described in 40 CFR Part 60, Appendix A.

(2) Any method determined by the director to be equivalent to paragraph (A)(1) of this rule.

(B) In lieu of the procedure specified in paragraph (A) of this rule, the owner or operator of a source that is subject to this chapter may elect to monitor compliance through use of a continuous monitor. The continuous monitor shall operate at least seventy per cent of the time during any calendar quarter. In the event the monitor malfunctions and is unusable for more than twenty-five per cent of the time during a calendar quarter, the director shall be notified in writing specifying the cause of the monitor malfunction, actions being taken to correct the malfunction and the estimated time before the monitor will be functional.
