3745-525-246  Leachate conveyance apparatus design.

(A) The leachate conveyance apparatus shall automatically remove leachate from the industrial facility to one of the following:

1. A leachate holding tank meeting the criteria in rule 3745-525-247 of the Administrative Code.

2. A public sewerage system.

3. An on-site treatment works or leachate pond.

4. A piping system returning the liquid to the manufacturing or industrial operation.

(B) Except for publicly owned sewers, any leachate conveyance apparatus located outside of the limits of industrial waste placement shall be:

1. Capable of being inspected.

2. Protected from the effects of freezing temperatures, crushing, and excess deflection.
